**Subject:** RE: West KL Ave. Landfill Meeting

Thanks Wally – but hopefully we will keep the presentation to 30 minutes or less and then 15 to 30 minutes for questions & open discussion, so we can strive to keep it less than an hour.

Kind regards  
Bill

Hello Bill,

That would be great. We should be able to run a webex for Shari to participate.

I think you can have the whole hour and half for the presentation/questions and answers.

Thanks.

Wally

**Subject:** RE: West KL Ave. Landfill Meeting

Good morning Wally,

Sure, we would be happy to provide a brief presentation to the MDEQ TAPS TEAM on March 21<sup>st</sup>. I have not talked with Golder's (Bob or Tim's) availability, but if one of them cannot make it, I could cover it as well. Perhaps we could run a webex so that Shari could also view & listen to the presentation.

Let me know how long our time-slot (expectations) would be.

Kind regards  
Bill

**Subject:** West KL Ave. Landfill Meeting

Hi Shari and Bill,

A meeting is scheduled with the MDEQ "TAPS" TEAM on March 21<sup>st</sup>, 10:30am to Noon in Lansing, Michigan to discuss the proposed ESD and the proposed GRUZ for the KL LF Site. The TEAM consists of MDEQ staff with expertise in several areas (e.g. GSI, Modeling, CSM, ICs and Ordinance etc.). The meeting on March 21<sup>st</sup> will be exclusively to discuss matters related to ICs on several sites in Michigan.

Bill and/or Shari, I am wondering if you or your consultants would like to make a presentation to the TEAM on the GRUZ and the ESD so they can have a complete information and clear picture of the proposals. It would help them, I think, in arriving at a fair and well informed deliberation. As I said, the March 21, 10:30am to Noon time slot has been set aside to discuss KL LF site.

Please let me know your thoughts at your earliest convenience.

Thanks.

Wally

**Subject:** RE: West KL Ave. Landfill Meeting

Shari, that's a good point.

I anticipate questions along the following lines to come up during the meeting:

- Do the residents at CFW know what is being proposed and what is their opinion about the proposal?
- Are there two separate and distinct aquifers in the CFW Subdivision as indicated in the ESD? Has there been any hydrogeological evaluation (including pump tests and Modeling) to demonstrate that there would not be vertical migration of contaminants through geologic barriers? etc.. etc...

Bill,

Before you meet with MDEQ TAPS Team, I recommend that you poll CFW residents to make sure they do in fact want to retain their wells. Otherwise we all are wasting our time pursuing something you're not sure residents really want. Thanks, Shari
